## **Analysis Plus to Give Away High-end Silver Cables at the Summer NAMM Show**

***Booth visitors can enter to win one of five Silver ThinLine instrument cables valued at \$179 each***

FLUSHING, MI – June 23, 2021 – ([GuitarPR](#)) – Analysis Plus, the manufacturer of high-end cables and connectors for musicians and pro audio as well as home audio, has upped the ante for their traditional NAMM Show cable giveaway. At the upcoming Summer NAMM show in Nashville on July 15-16, the company will be giving away five of its highly acclaimed Silver ThinLine instrument cables at booth #201.

All attendees can enter at the booth for a chance to win one of the cables and a public drawing will take place in the booth at noon on July 16. Winners who are present at the drawing will receive their cable onsite. Other winners will receive an email and their cable will be shipped to them. The cables for the giveaway are 10-foot length with straight-to-straight connectors that normally sell for \$179.

The Silver ThinLine instrument cable is part of a high-end line designed and made in the USA for over 25 years. This is a super light cable that acoustic players among others love the sound and feel of. Solid Silver (99.99%) is used for the center conductor on the connector. Available with multiple connector options, the Silver ThinLine cable uses two 20 AWG silver plated copper conductors for a natural full sound. Get more info on the Silver ThinLine at:

Analysis Plus will be displaying the bulk of its pro audio cable and connector line, including its popular QiJACK, the input/output jack that is built like a tank and performs like a Ferrari. Company president, Shari Markel will be available at the booth along with technical staff to answer questions, discuss show specials and dealer opportunities.
