## Magnatone Introduces the Starlite Reverb 10 at 2026 NAMM Show

ST. LOUIS, MO – January 22, 2026 – ([GUITARpr](#)) — Magnatone is truly proud to introduce the **Starlite Reverb 10**, a sweet-sounding, much-in-demand update of the original “grab and go” Starlite. This new evolution features a **larger speaker, increased output, and a more lush, full sound** — all still in a small footprint.

“The upgrades we designed include a **6L6 power tube** for the **8 watts of Class A single-ended power** and the **10-inch speaker** in a slightly larger cabinet,” explains Obeid Khan, Magnatone’s Chief Engineer. “These two changes alone make a big sonic difference in tone clarity, volume, projection, and overall performance.” Khan says the amp keeps its **Accutronics Digi-Log spring-style reverb, Traditional cosmetics, and compact footprint**, making it “a nice little bedroom-office-study-studio amp.”

Like all Magnatone amps, the Starlite Reverb 10 is all **hand-made in the USA** and features one **12AX7 preamp tube** and one **6L6 power tube**, giving players **8 watts of Class A output** through a **Magnatone Custom 10” ceramic magnet speaker**. Additional features include **High and Low sensitivity inputs**, an innovative **tone control which spans “black-panel” and “tweed-era” voicings** with a **mid-cut below 12 o’clock**, **switchable negative feedback** and an **8-ohm extension speaker output**. **Vintage-inspired Traditional Collection cosmetics** highlight and accent the Starlite Reverb 10 in the same way that made the original model a true in-demand favorite.

**Ted Kornblum**, President and CEO of Magnatone, says, “Our customers love the Starlite’s vibe and performance of being ‘the-little-amp-that-could,’ and now it’s the ‘little-amp-that-can.’ I’m proud to say that we’ve delivered it.”

The **Starlite Reverb 10** is available in 100% cotton **Traditional Brown, Camel, Dark Green, and Traditional Black** covering, carries a **MAP of \$1,899**, and is available through authorized Magnatone dealers. To learn more or to find a

## About Magnatone

The Magnatone brand was first established in 1937 in Los Angeles, CA. The company is most famous for inventing and patenting the stereo pitch-shifting vibrato effect using a non-moving part. Legendary artists such as Buddy Holly, Lonnie Mack, Jeff Beck, and Robert Ward have all used Magnatone. Magnatone Amplifiers was revived by Ted Kornblum in 2007, and today the company manufactures high-end boutique tube guitar amplifiers made in the USA. Guitarists including Billy Gibbons, Slash, Neil Young, Jason Isbell, Brandi Carlile, Lukas Nelson, Charlie Sexton, and Neko Case are just a few of the artists who play Magnatone.
