

FOR IMMEDIATE RELEASE

Voyage Air Guitars: Full-Size Travel Innovation – Continuously Evolving for Players Everywhere

OCEANSIDE, CA — April 1, 2026 — ([GUITARpr](#)) — **Voyage Air Guitar** continues its mission to deliver the ultimate travel guitar: a full-size, no-compromise instrument that folds in half for effortless portability without sacrificing tone, playability, or professional quality.

Since pioneering the patented folding technology over 15 years ago — including an early appearance on Shark Tank — Voyage Air has turned every challenge into opportunity, steadily advancing design and production methods, manufacturing (with key proprietary parts now produced locally in California), build quality, and prototyping new cutaway models.

Voyage Air's ongoing evolution ensures players can take their favorite guitar anywhere — car trips, gigs, busking, camping, or beyond — while enjoying the full acoustic experience that competitors' compact designs simply can't match.

"Players tell us the 'wow' moment comes when they unfold the guitar in seconds and find it ready to play, still in tune and sounding incredible," said Jamie Cohen, Chief Operations Officer. "It's not a compromise — it's freedom to Bring the Music™ wherever life takes you."

Voyage Air's current lineup, including the versatile Songwriter Series cutaway models, reflects this commitment to innovation and reliability. Looking ahead, the team is excited to introduce even more advancements and long-requested features in the coming months.

Voyage Air is also opening up select dealer partnerships and distribution opportunities. Interested parties are encouraged to contact the company for details.
