Pat Wilkins Adds New Marlin Medium Scale Basses

New addition to RoadTested bass line debuts at Winter NAMM Show

LOS ANGELES, CA – January 18, 2019 – ([GuitarPR](#)) – Wilkins Custom Guitars & Finishes has announced the latest addition to their well-established RoadTested bass line called the Marlin. The new Marlins feature a 32” medium scale and are available in both four and five-string models.

The Marlin 4 offers a classic body shape in Alder or Ash with a Maple neck and fingerboard of Rosewood or Maple. Choose a Vintage 1.5” or Modern 1.665” C-shape neck. Both models feature a 10” fingerboard radius with Vintage 6230 Nickel Silver Frets.

While similarly equipped, the Marlin 5 features a modern body shape and 1.75” modern C-shape neck. Both models come with Hipshot bridges and Hipshot Ultralite Tuners as well as Howard Ulyate pickups created for Wilkins basses.

Like all RoadTested basses, the new Marlins are available in a variety of spectacular Wilkins finishes including Solid, Sunburst, Metallics, Satin or Gloss.

“The Marlin basses are built here in California, USA with the same high quality parts I use on all my basses along with the same attention to detail that we’ve been known for all these years,” said founder, Pat Wilkins. “All the options that I offer on my standard scale basses will be available on these new models.”
